

Expert Roster

-- D4 --

Overview

The Roster of Experts from the former Global Support Programme has been fully integrated into the Climate Transparency Platform (please see screenshot below).

The Experts page can be accessed here: <https://climate-transparency-platform.org/experts>

Here you can find a list of thematic transparency experts as a resource database should you be in need for a specific expert(s). This list of experts stems from the former Global Support Programme and has been fully included here. However, CBIT-GSP takes no responsibility for these experts.

It is possible to browse and search experts by the area of expertise within different transparency aspects. These are "Institutional Arrangements", "NDC Tracking", "Vulnerability & Adaptation", "Greenhouse Gas Inventories", "Mitigation Actions", and "Constraints, Gaps & Needs".

If you want to be included as an expert, please contact us at climatetransparencyplatform@gmail.com and share your CV.
